Medicine.

(This Invention received Provisional Protection only.)

PROVISIONAL SPECIFICATION left by Oscar Laurence at the Office of the Commissioners of Patents, with his Petition, on the 17th August 1865.

I, OSCAR LAURENCE, of 226, Euston Road, in the County of Middlesex, do hereby declare the nature of the said Invention for "A NEW MEDICINE FOR THE CURE OF THE DISEASES OF THE STOMACH (DYSPEPSY, CARDIALGY, INDIGESTION) AND THE HEMORRHOIDS," to be as follows:—

This new medicine composed of the entirely innocent substances:—2 oz. socatrine aloes, $\frac{1}{2}$ oz. zedoary, $\frac{1}{2}$ oz. gentian, $\frac{1}{2}$ oz. rhubarb, $\frac{1}{2}$ oz. agaric, and $\frac{1}{2}$ oz. saffron mixed together with 1 gallon of pure corn brandy is prepared by distilling at a moderate heat during eight days, and when strained through linen, and cool, will be fit for use.

The prescription is two table spoonfull in the morning before breakfast and the evening before going to bed.

It is a really efficacious remedy for the cure of 1, the diseases of the stomach [dyspepsy, cardialgy, indigestion]; 2, the hemorrhoids; especially such as have defied the hitherto known medical means, and were considered incurable. My medicine cures them perfectly so that not the least trace of those disases, however deeply rooted, will be left.
